Scuba N1

Key Features

Unparalleled Cleaning Performance - Effortlessly clean in-ground pools up to 1600 Sq.Ft/150m², including your pool's walls and waterline, all with the Aiper Scuba N1. Combining a brushless drain motor, the Scuba N1 filters up to 80 GPM (300 LPM) of your pool's water while the dynamic silicon brush ensures dirt and debris removal.

Caterpillar Treads for Superior Mobility - For edge-to-edge cleaning, no matter what terrain your pool throws at it, the Aiper Scuba N1 is up to the challenge. The caterpillar treads of the Scuba N1 provide greater surfer contact with your pool. Meaning better traction, superior mobility, and superior obstacle traversal along your pool's floor and walls.

WavePath™ Navigation Technology 2.0 - Leveraging cutting-edge technology, WavePath™ 2.0 takes advantage of the natural flow of your pool, thereby increasing cleaning coverage. Top-of-the-line sensors allow the device to pinpoint the device location within your pool, delivering the most pristine clean for your pool's floor, walls, and waterline.

Other Features

Four Cleaning Modes - Optimize pool cleaning with the Scuba N1's multiple modes: Floor, Wall, Floor + Wall, or Eco (Periodic Cleaning). Tailor each session to your pool's specific needs for efficient, time-saving cleaning.

Periodic Cleaning - Your Aiper device will clean for 45 minutes every 48 hours before entering low power mode. This cycle repeats three times, ensuring your pool stays clean throughout the week. When the weekend arrives, your pool is swim ready, not ready to clean.
